# Installation

Place YouView wherever you want (Applications, Desktop, etc...) and then start YouView.

## How to use

### YouView Browser

The YouView browser is quite simple and easy to get around.

Search - Type what you want and push return/enter.

Message Box - Says when you have new videos in your subscriptions and other information.

Feeds Bar - Contains useful feeds for quick access to your favorite videos, your friends videos and subscriptions.

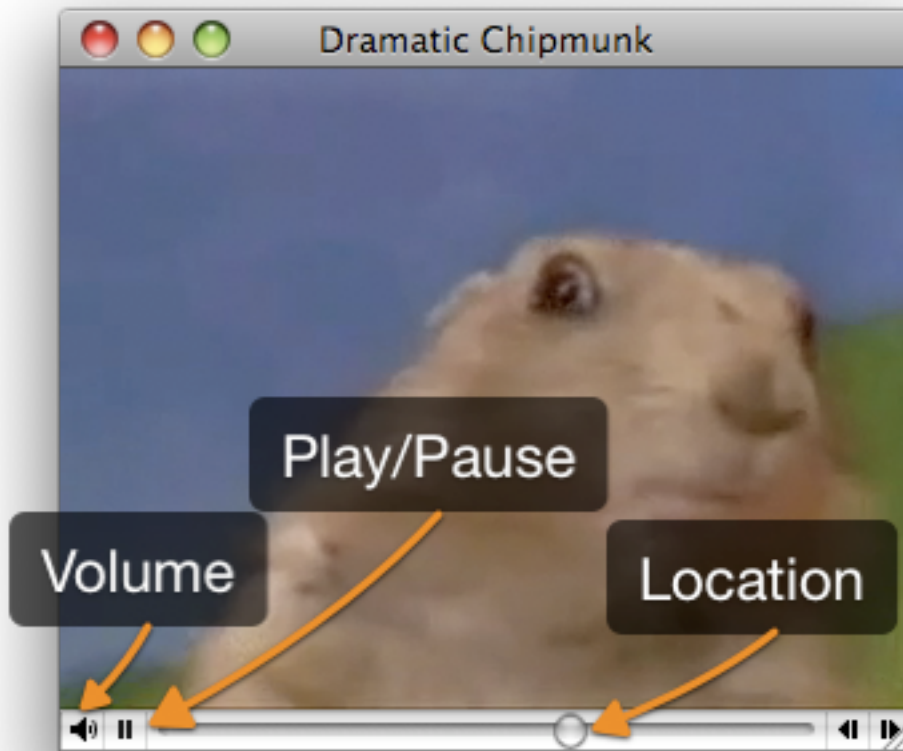

Results - When you search or click on a feed, you'll see all the videos for that feed or search in this box.

Next and Previous Page - Allows you to go through pages of videos and find more results.

Log in/out - Allows you to post comments, access your subscriptions, view your playlists and view your favorites.

## Video Player

The video player is the easiest things to use in YouView.

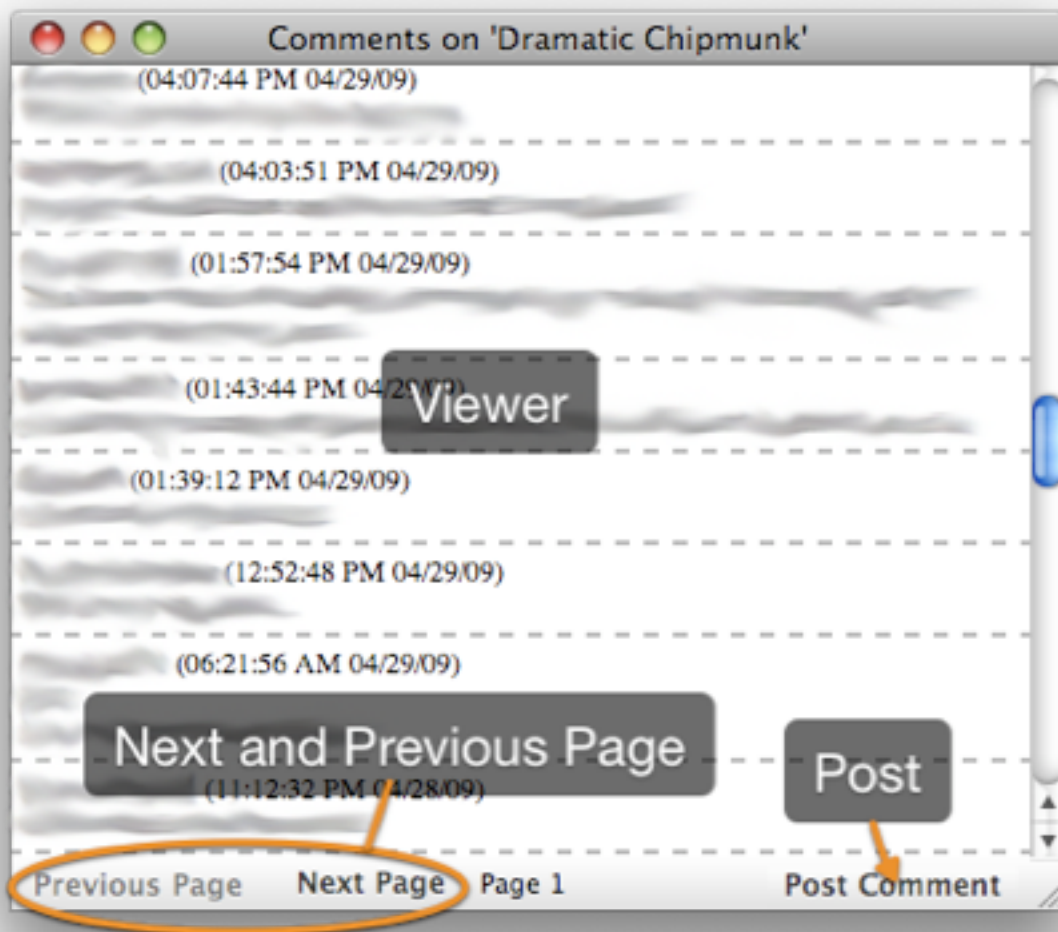

Volume - Control how loud the video is during play back, you can also control this with your keyboards up and down keys.

Play/Pause - Stop the video play back and restart where you left off, you can also control by clicking the video or pushing the space bar.

Location - Tells you where you are currently watching by the length of the video.

## Comments

Comments is a way to communicate what you think about the video with others and the poster. To view the comments, Go to the menu View->Comments or keyboard shortcut  $\text{⌘}-\text{⌘}-\text{C}$ .

Viewer - Shows you the comments for the video.

Next and Previous Page - Allows you to go through pages of comments and find more comments

Post - Post your own comment for others to see.

Message - Text box where you type in your message.  
Remaining Count - How many characters you can type.  
Cancel - Don't post and go back to the comments.  
Post Comment - Post this comment for others to see.

### Apple Remote

You can use your apple remote to control videos in YouView.

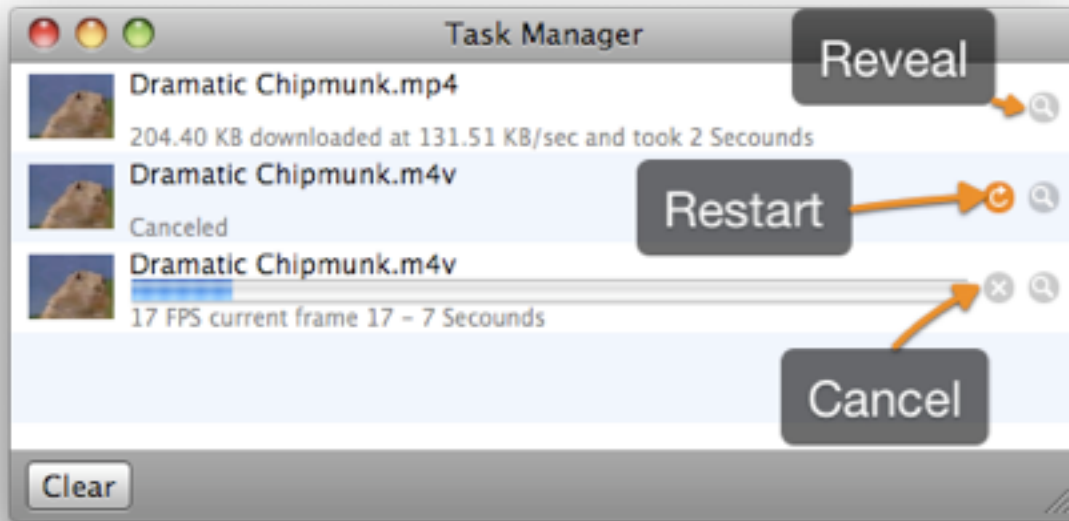

Plus - Go up the list of videos in the results and turn up the volume of a video.  
Minus - Go down the list of videos and turn down the volume of a video.  
Plus Hold - Turn up the volume all the way of a video.  
Minus Hold - Mute the volume of a video.  
Previous - Rewind a video.  
Next - Fast forward a video.  
Play/Pause - Play a video.  
Play/Pause Hold - Close a video.  
Menu - Go full screen.

Menu Hold - Go to the list of results.

Note: To use these controls YouView must be the front most application.

### Task Manager

The task manager is what manages downloads and exporting.

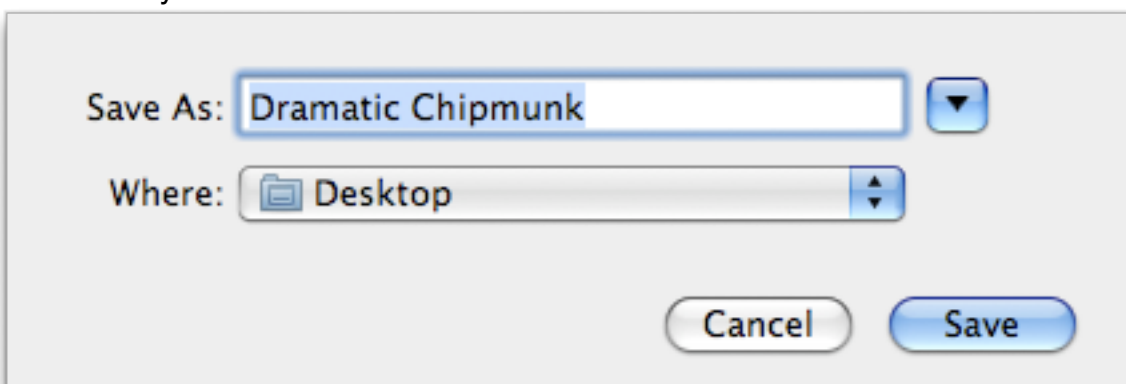

Reveal - Shows the video file in the finder. If not completed, it'll show the YouView Download File.

Restart - If you canceled the download or export, it'll allow you to restart the download/export.

Cancel - Stops your download/export.

### Downloading YouTube Videos

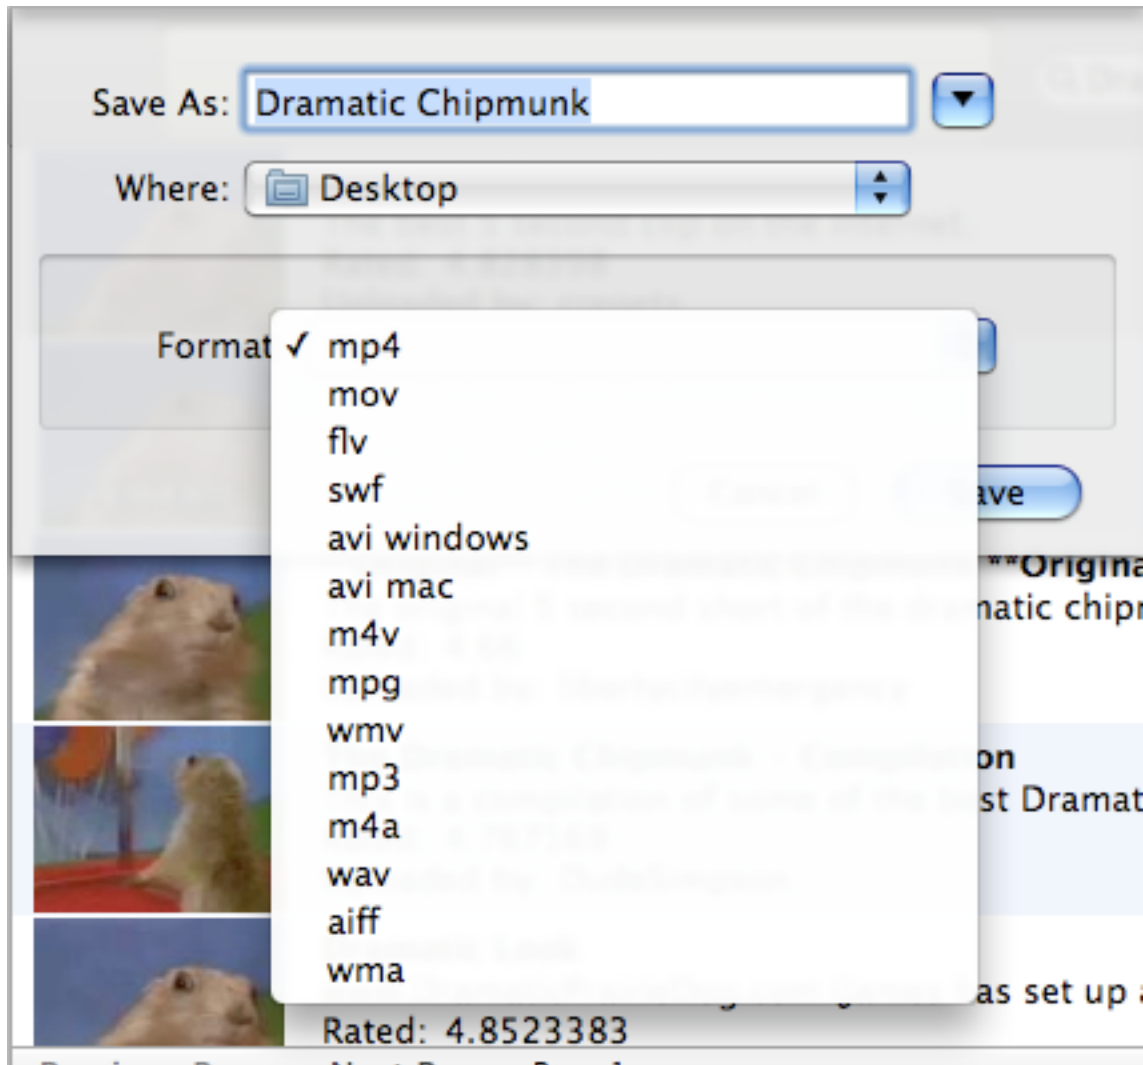

To download a video that you want to place on your iPod or anything that supports H. 264 and AAC, open or select the video you want to download, go to the menu File->Save or keyboard shortcut ⌘-S.

It automatically places the title of the video in it for your convince, you click save and it downloads.

## Exporting YouTube Videos

To export a video that you want to place on other devices such as windows, open or select the video you want to export, go to the menu File->Export or keyboard shortcut ⌘-E.

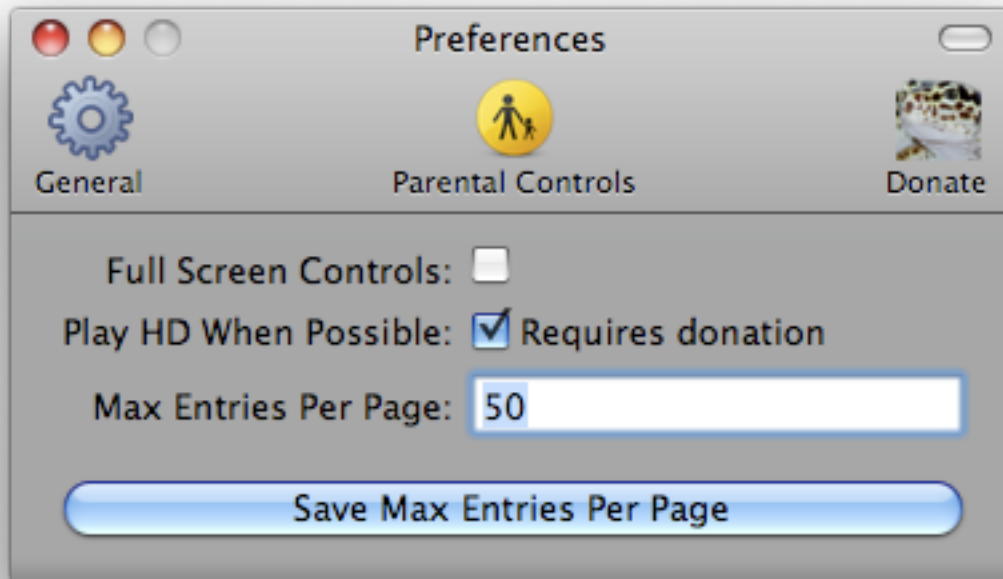

You can choose any of the formats listed to export to, some formats may not support multi cores and be slower than others.

## Preferences

The preferences is a place to configure settings for YouView. To open the preferences go to the menu YouView->Preferences or keyboard shortcut ⌘-COMMA.

### General Panel

Full Screen Controls - Whether or not to display the controls for videos when in full screen mode.

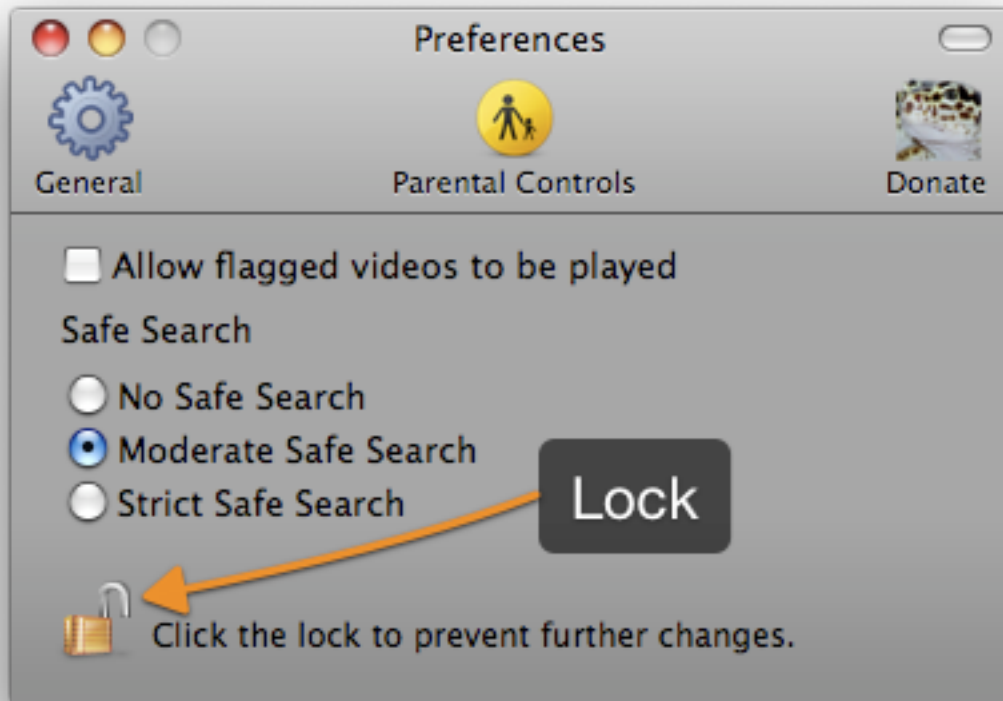

Play HD When Possible - Whether or not to play HD videos when you donated.

Max Entries Per Page - How many videos to display in the results per a page.

## Parental Controls

The parental controls is for parents that wants to protect their children from viewing explicit content on YouTube. You must have the administrator password of your computer to make changes to parental controls, the settings are encrypted in 2 keys, 1 normal key and 1 random key, that prevents kids from changing the settings by hand.

Allow flagged videos to be played - Allow videos that users on YouTube marked as bad. [More info here.](#)

Safe Search - How strict should YouTube be on unsafe content when searching.

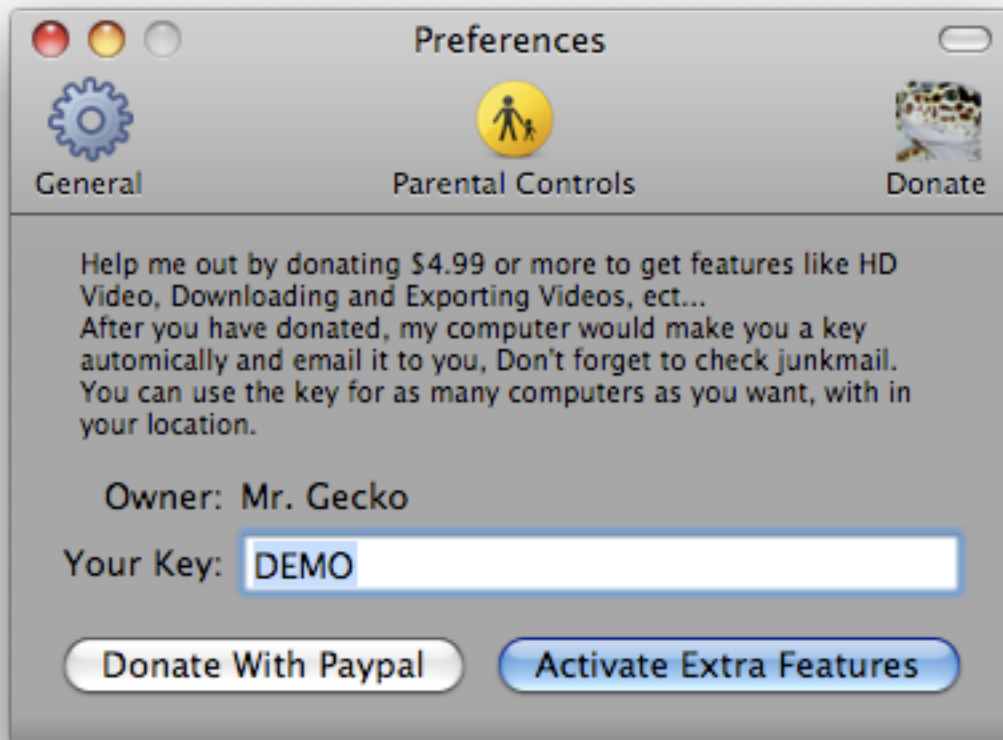

Lock - Unlock/Lock this panel using Administrator password.

## Donations

Donations helps me in development for the application and I'm giving you a free gift just for donating, if you donate at least \$4.99, I'll give you HD, Downloading and Exporting. These features I spent most time on and isn't anything that has to do with what YouView was made for.

## How do I donate?

To donate, go to the menu YouView->Preferences or keyboard shortcut ⌘-COMMA, go to the Donate panel and donate.

## Contacting Me

If you need help or if you have an idea for YouView, contact me at [support@mrgeckosmedia.com](mailto:support@mrgeckosmedia.com) or go to <http://mrgeckosmedia.com/contact>.

Thanks for downloading YouView,  
Mr. Gecko.
